## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 2, 3, 7, 9-11, 20 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 6, for example, there is no antecedent basis for “the outside” (line 4), etc. Clarification is requested.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 2, 3, 7, 9-11, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of JP '216, JP '420, JP '847 or JP '239 in view of Lindner (US 5,498,431). The JP '216, JP '420, JP '847 and JP '239 references disclose the claimed subject matter except for the kettle washing means having an ultrasonic generator. The patent to Lindner

Art Unit: 1761

discloses that it is known in the art to have provided ultrasonic generators (30) for treating foods such as cereals, etc. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided either one of JP '216, JP '420, JP '847 or JP '239 with ultrasonic generators in the manner suggested by Lindner for propagating ultrasonic waves to the water supplied in the rice kettle, if desired.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
